

# Opticon™ 3

with FYI Internet Technology

Work with confidence to meet every production challenge

## IMPROVE YOUR IMAGE MANAGEMENT AND PRODUCTION

Opticon 3 is the fast and easy way for litigation teams to view, organize, and share scanned discovery documents in preparation for trial. It puts power and simplicity in your hands, so you can automate administrative tasks and achieve the highest quality results. Smooth integration with Concordance and FYI Internet Server software further simplifies how you receive and deliver images.

### ESSENTIAL TOOLS

#### Professional Image Viewing

Quickly retrieve and view images side-by-side with the document text in a Concordance database:

- Find images by production, bates number, date, author, etc.
- Displays black & white and color images
- Zoom, pan, scroll, rotate, and use new sticky rotate to view all images in the same rotational direction
- Resize and enhance image readability with gray-scaling
- Recognizes a large number of image formats: BMP, CALS, DCX, GIF, JPEG, LD, MARS, NAVSEA, NIFF, PCX, PDA, TIFF, TMS

#### Precision Editing

Allows you to flag important information and redact confidential sections:

- Add color highlighting, shapes (arrows, boxes, etc) and annotations and notes

- Insert customized redaction stamping, e.g. attorney/client privilege
- Retain image integrity by saving all markups, annotations, and redactions as an overlay file
- Search redlines by type (redactions, notes, etc.), author, or content
- Synchronize image base with new replication feature

#### Use Opticon 3 to:

- Display images in perfect synch with Concordance
- Quickly organize documents for production
- Easily create and edit annotations
- Burn redactions onto productions
- Protect original image integrity
- Conduct high volume printing
- Access images from anywhere in the world using FYI
- Share images with Sanction for superior trial presentation
- And more...

#### Superior Production Tools

Easily organize discovery and create new document productions from your database queries:

- Renumber production sets to eliminate page gaps and brand with new Bates numbers or barcodes
- Burn in redactions, redlines, highlights, image keys, barcodes, custom notes, and text from database fields into documents
- Separate or consolidate TIFF images with one click
- Create a subset imagebase, easily save and export image sets to CD or DVD as a new imagebase
- Organize images for CD or DVD production by specifying volume directories and volume size, eliminating document breaks between volumes
- Write production numbers back to your Concordance database for easy tracking and reporting

#### Advanced Printing

Make high-volume print runs painless:

- Select single or batch image printing
- Print or suppress redactions, annotations, redlines, highlights, and notes
- Add text from database fields to divider sheets
- Print auto-increment production numbers
- Calculate total pages before printing
- Print divider sheets and pull from separate printer trays

#### Presentation in the Courtroom

Pinpoint just the right evidence for presentation to a jury:

- Magnify and highlight trial exhibits on-screen
- Maximize screen viewing with Presentation mode
- Access Barcoded images
- Instantly send images to Sanction II

### **Straightforward and Easy-to-Use**

Designed to support all levels of users and help to minimize the learning curve:

- Simple installation and configuration
- Intuitive icon driven interface includes floating tool tips, clear documentation, and context sensitive help

### **Take a Free Test Drive!**

See for yourself! Go to [www.dataflight.com](http://www.dataflight.com) to download your Free 30-day Trial of Opticon 3 today! For more information, call 800/421-TEXT or email [moreinfo@dataflight.com](mailto:moreinfo@dataflight.com).

Dataflight is committed to helping our customers succeed. We work hard to deliver one of the fastest technical response and resolution times in the industry. And it's absolutely free to our customers.

## **FYI Internet Technology Extends the Power and Reach of Opticon 3**

Dataflight's FYI Internet Server software is a highly integrated client/server solution to help attorneys, paralegals, and litigation support staff access their case critical information and collaborate from anywhere in the world using Concordance 8 and Opticon 3.

FYI maximizes the flexibility of the Internet without sacrificing Opticon's performance or functionality:

- Authorized users can access a remote imagebase as easily as if it were stored on their PC or local network
- Images can be scaled down to as little as 10 percent of the original size to enhance transfer speed and preserve bandwidth
- Remote offices, co-counsel, and clients can collaborate on details and share images without sacrificing the integrity of case data or privilege
- Discovery documents and data are fully protected as they are shared internally and externally

### **System Requirements**

- Microsoft® Windows 98/2000/NT/XP
- Personal computer with a Pentium® 100 or higher processor
- 128 MB of RAM
- 20 MB of available hard disk space
- 800 x 600 display, 256 colors
- Windows compatible mouse
- CD-ROM drive
